

 <b>CENTRAL ELECTRIC</b>	<b>Interconnection Process for Generation Systems/Wheeling Flow Diagram Summary</b>
---	---

The applicant or their consultant should first obtain information regarding Bonneville Power Administration's (BPA) requirements for interconnection of a generator (>200-kW), have a basic design concept in mind, and an electrical one-line diagram of the project prepared. The contact point at BPA is Eric Taylor at (360) 619-6014 or [ektaylor@bpa.gov](mailto:ektaylor@bpa.gov). The applicant or their consultant should also be made aware of special rates and programs available to generators who participate in CEC's load management program. Please contact CEC for more information at (541) 548-2144, or refer to the CEC website at [www.cec.coop](http://www.cec.coop).
